

AI in Human Subjects Research

References

Rutgers IRB drew upon the following resources to prepare this document and its appendices. Any use of generative AI in conducting research for and producing this guide adheres to ethical guidelines for using and acknowledging generative AI in professional and academic research (Porsdam Mann et al. 2024). Rutgers IRB staff and consulting faculty made substantial contributions to this document, which has been thoroughly vetted for accuracy, and assume responsibility for the integrity of their contributions. They gratefully acknowledge the editors and contributors of the following source material.
