RUAC Approved Vendor List

Rutgers University Animal Care program (RUAC) routinely receives animals from the following approved commercial vendors and may be used following an acclimation period. Animals sourced from academic institutions and novel regional vendors, or certain species must be evaluated or conditioned in quarantine. Approved vendor status is determined by the Veterinary Staff based on vendor health surveillance reports and history of pathogen outbreaks. Investigators who wish to have a vendor included as an approved vendor should contact the Director of Veterinary Services.

Species	Vendor
MOUSE	Charles River Laboratories[1]
	Inotiv (Envigo)[1]
	Jackson Laboratories[1]
	Mutant Mouse Resource & Research Centers (MMRRC), Jackson Laboratory [2]
	CRL/NCI Animal Production Program (CRL-managed)[1]
	Taconic Biosciences[1]
	GemPharmatech-(Nanjing Facility only) [1]
RAT	Charles River Laboratories[1]
	Inotiv (Envigo)[1]
	Rat Resource & Research Center (RRRC) [3] – w/ Conf of Neg Cb
	Taconic Biosciences[1]
COTTON RAT	Inotiv (Envigo)[1]
HAMSTER	Charles River Laboratories[1]
	Inotiv (Envigo)[1]
GERBIL	Charles River Laboratories[1]
GUINEA PIG	Charles River Laboratories[1]
RABBIT	Charles River Laboratories[1]
	Inotiv (Envigo) [1,3]
XENOPUS/FROG	Ecocyte – (oocytes)
	Rana Ranch / Frog Pharm
	Xenopus Express
SWINE	Animal Biotech Industries (ABI) - tissues only
	Marshall Bioresources
	Sinclair
	Premier Biosource
CANINE (Beagles)	Marshall Bioresources[1]
SHEEP	Archer Farms (females must be Q fever free)
FERRET	Marshall Bioresources[1]
	Triple F Farms[1] (influenza free)

[1] *AAALAC-Accredited Facility*

[2] *All other MMRRC sites must be placed through importation process and quarantine program*

[3] *Veterinary review required with pretesting and/or treatment prior to order approval*

[4] *Requires completion of iLab import request for coordination of 3rd party courier services for animal transport*
