

2021 Approved Vendor List

Comparative Medicine Resources (CMR) routinely receives animals from the following approved commercial vendors and may be used following an acclimation period. Animals sourced from academic institutions and novel regional vendors or certain species must be evaluated or conditioned in quarantine*. Approved vendor status is determined by the CMR veterinary staff based on vendor health surveillance reports and history of pathogen outbreaks. Investigators who wish to have a vendor included as an approved vendor should contact the Director of Veterinary Services of CMR.

Species	Vendor	CMR Unit	
		North Campus Newark/NJMS	South Campus Piscataway/NB
MOUSE	Charles River Laboratories ¹	✓	✓
